ABOUT ME

I am kind of person who will never give up on anything, once I take up the job. I will provide cent percent effort, focus to accomplish it.

I am a big fan of anime, during my free time I spend time watching anime, reading manga. I also work on development activities out of my self-interest as a hobby one such recent project is [PasswordManager](#)

2014-2018

Intermediate – 92.3 %

Sri Chaitanya Junior College
2012-2014

S.S.C – 9.0 GPA

Vivekananda public School
2011-2012

EXPERIENCE

Software Engineer

TCS/Chennai

During my journey with TCS I worked on different set of things as stated below

- 1. Production Support**
 - Working on vulnerabilities.
 - Managing changes in Production by testing environment wise.
 - Production issue resolution.
 - Querying on MSSQL Servers DBs to retrieve data.
- 2. Ansible Automation**
 - All the servers I dealt with are windows servers, wrote some scripts to maintain those servers. Like to retrieve health check info as a mail notification on a scheduled timely basis
 - Wrote some scripts to perform changes like registry, software installation or upgradation, service restarts etc.
 - Worked on scripts to switch between DR and PROD environments.
- 3. Manual task Automation using python**
 - Our team deals with 10 applications, so based on job status we will get logs and files which we need to monitor manually
 - Automation of those tasks using python and wrote scripts to monitor app directories and send status mail notifications as required.
 - Made use of multi-processing and multi-threading concepts while working on this automation script since it has to deal with a lot of things simultaneously
